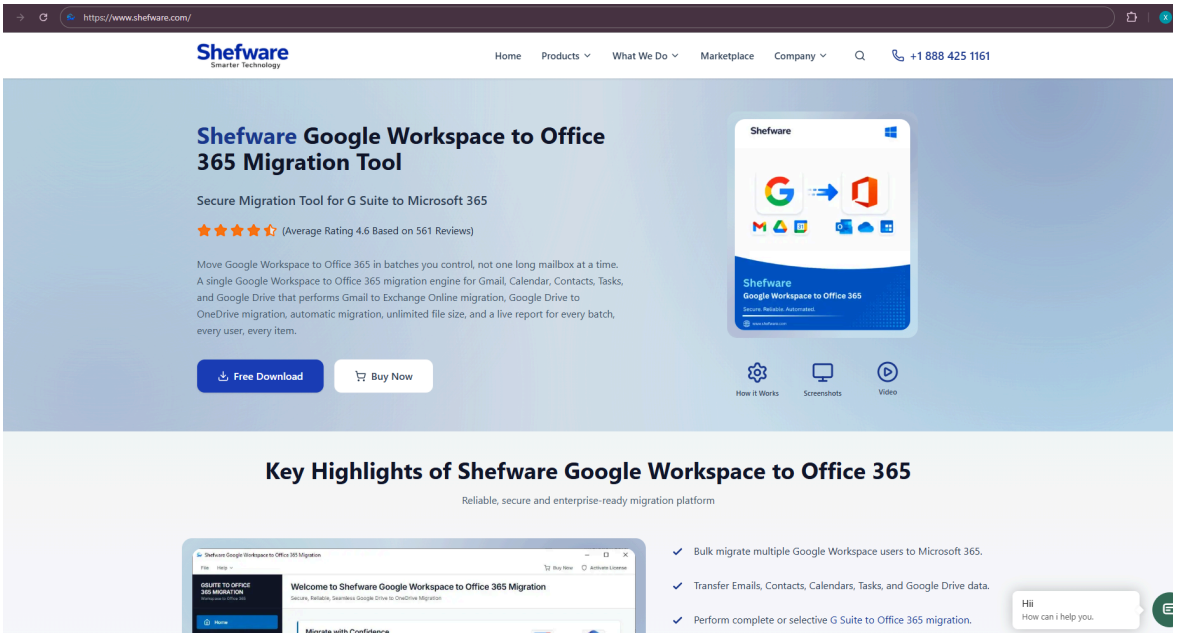
Shefware Tool Installation Guide

How to Install Shefware Software on Windows?

Installing Shefware Google Workspace to Office 365 Migration is fast and simple. Follow the steps below to install the software on Windows successfully.

Step 1: Download the Software

Go to the official Shefware Website and download **Shefware Google Workspace to Office 365 Migration**. Once the download is completed, locate the setup file in the downloads folder.

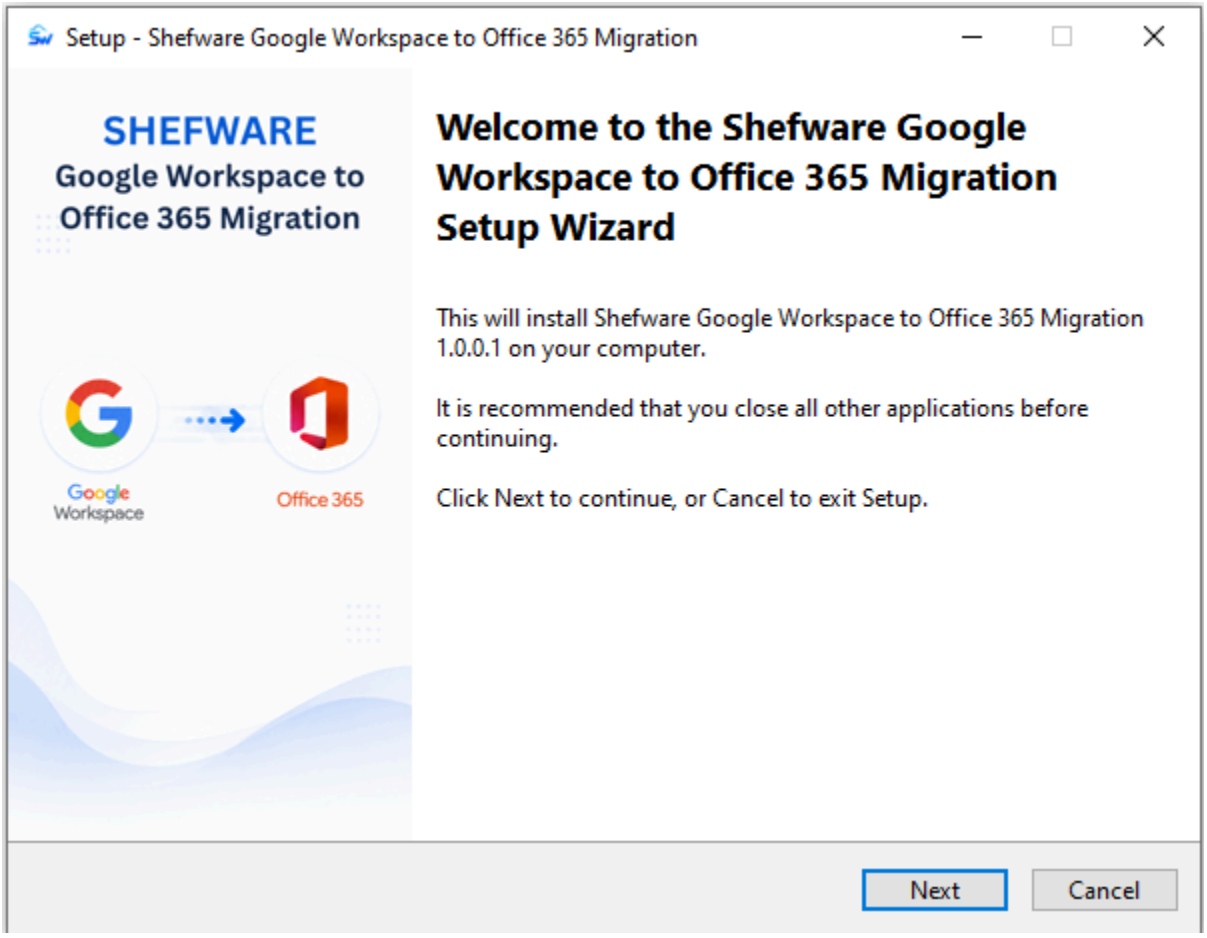


Step 2: Introduce the Setup File

Click twice on the download setup file **(Shefware Google Workspace to Office 365 Migration .exe)**. If Windows shows a User Account Control prompt asking for permission to make changes to the device, click **Yes** to continue.

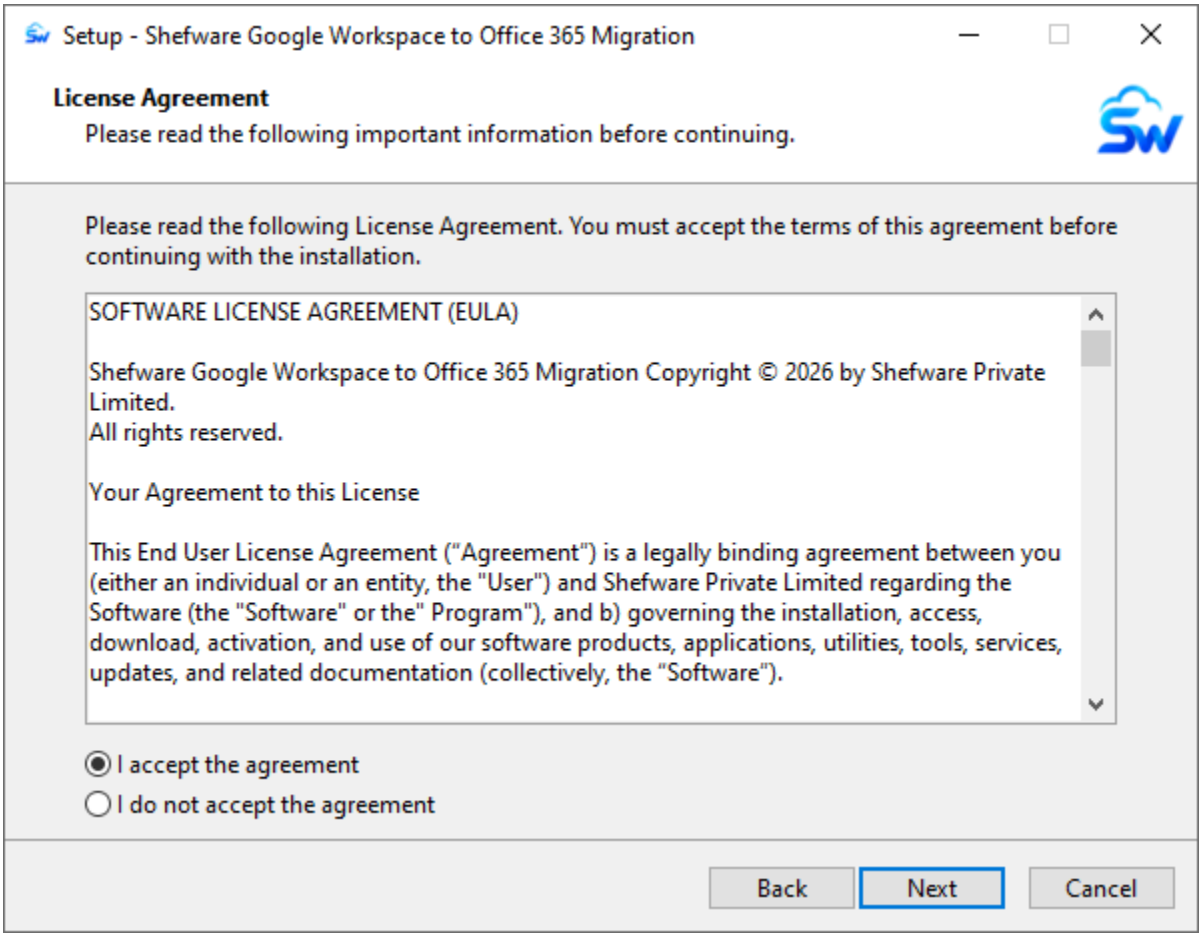
Step 3: Begin the Installation Wizard

The **Shefware Google Workspace to Office 365 Migration Setup Wizard** opens on the screen. Click on **Next** to start the installation process.



Step 4: Accept License Agreement

Read the Software License Agreement carefully. Choose **I Agree** or **Terms and Conditions** and click on **Next** to proceed further.

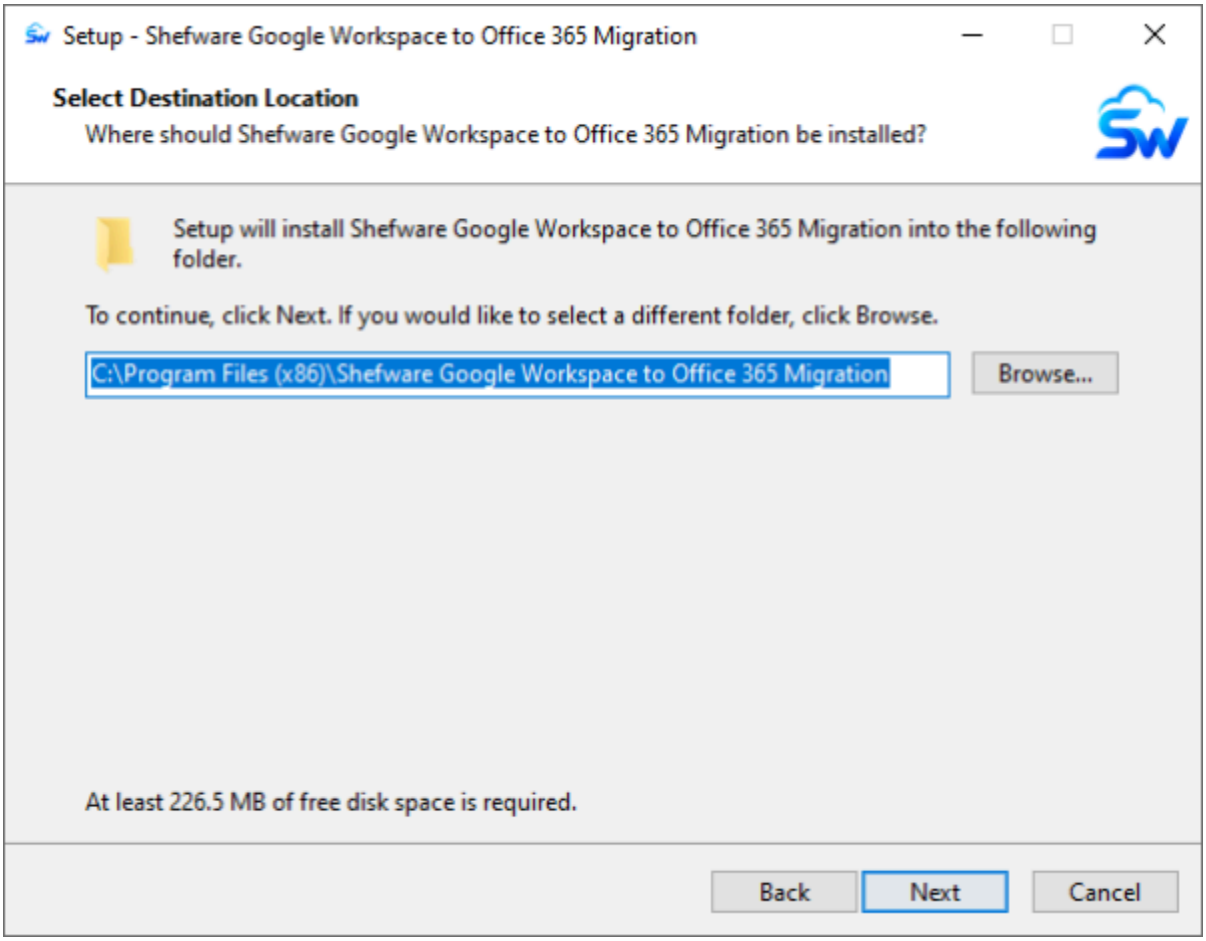


Step 5: Select Installation Location

Choose the folder where you want to install the software. By default, the application will be installed in:

c:\Program Files\shefware**Google Workspace to Office 365 Migration**

To select a different location, click **Browse,** choose the preferred folder, and click **Next.**

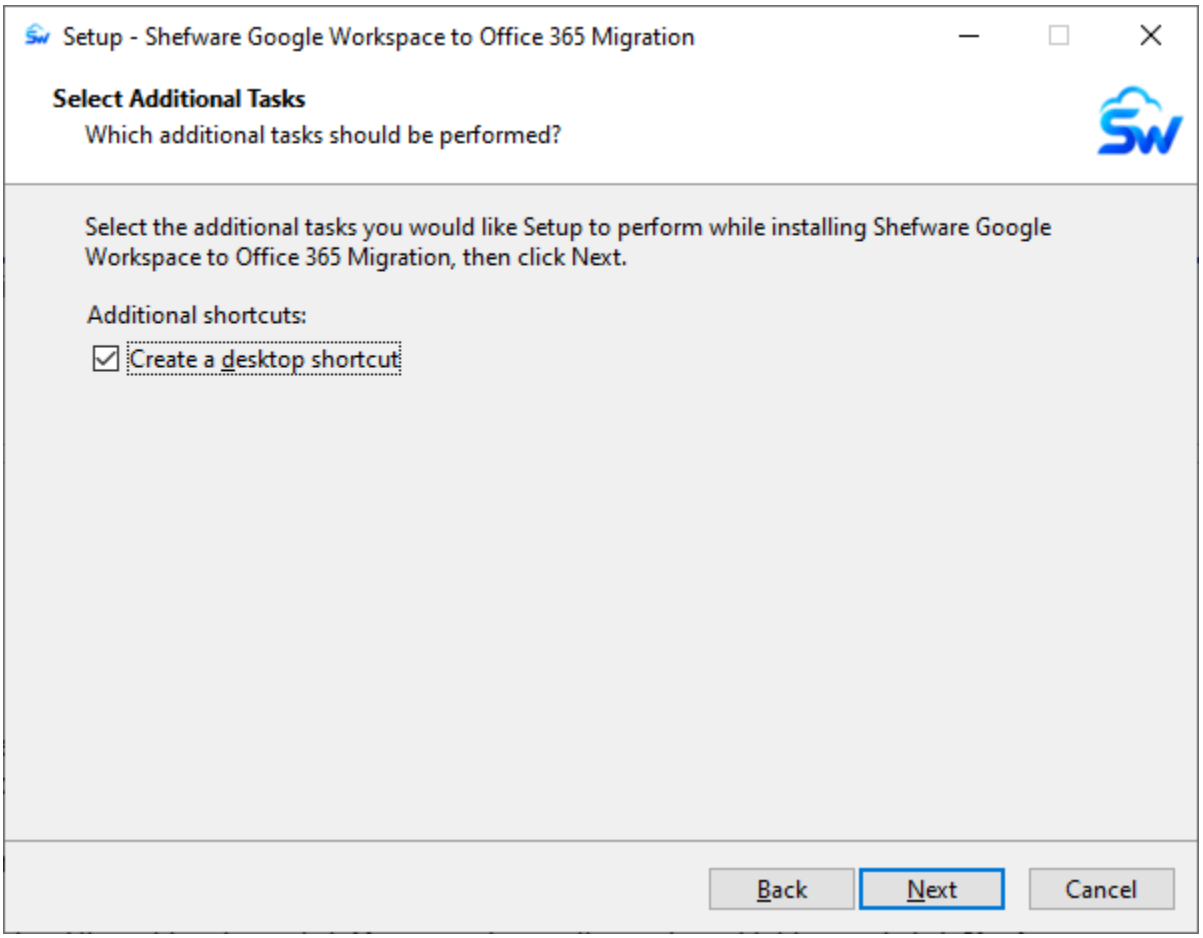


Step 6: Allocate Additional Options

Choose any additional installation preferences such as:

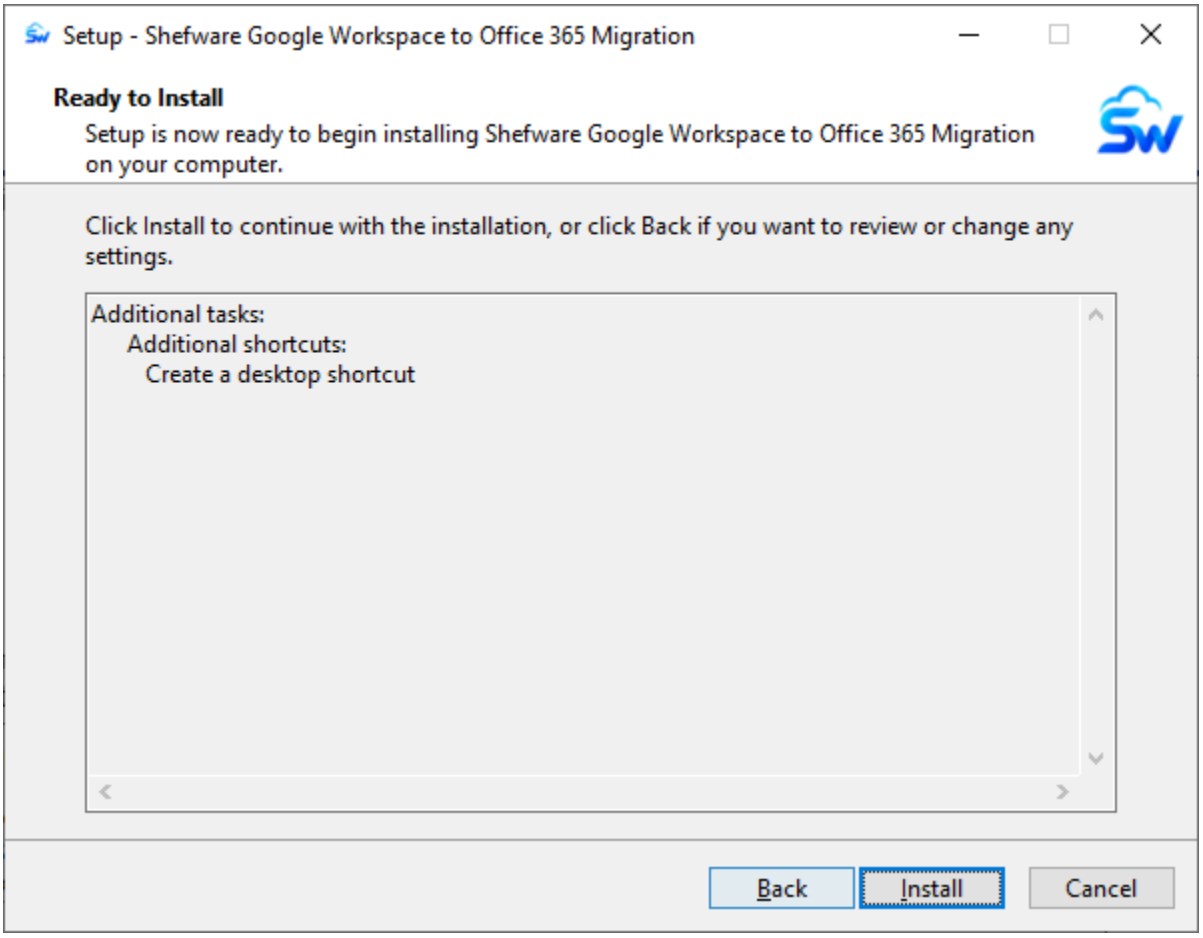
- Create Desktop Shortcut
- Launch Application After Installation

Select the option that is ideal for your needs and click **Next.**



Step 7: Install the Software

A summary of installation settings will be shown. Review the details and click **Install** to start the installation. Kindly wait while the setup wizard copies the important files to the system.



Step 9: Complete the Installation

Once the installation is completed, a confirmation will display specifying **Shefware Google Workspace to Office 365 Migration** has been successfully installed. Click **Finish** to close the

setup Wizard.
