

Shefware Tool Uninstallation Guide

How to Uninstall Shefware Software from Windows?

If you do not need Shefware PST Merge , you can easily remove it from the Windows system by following the steps given below:

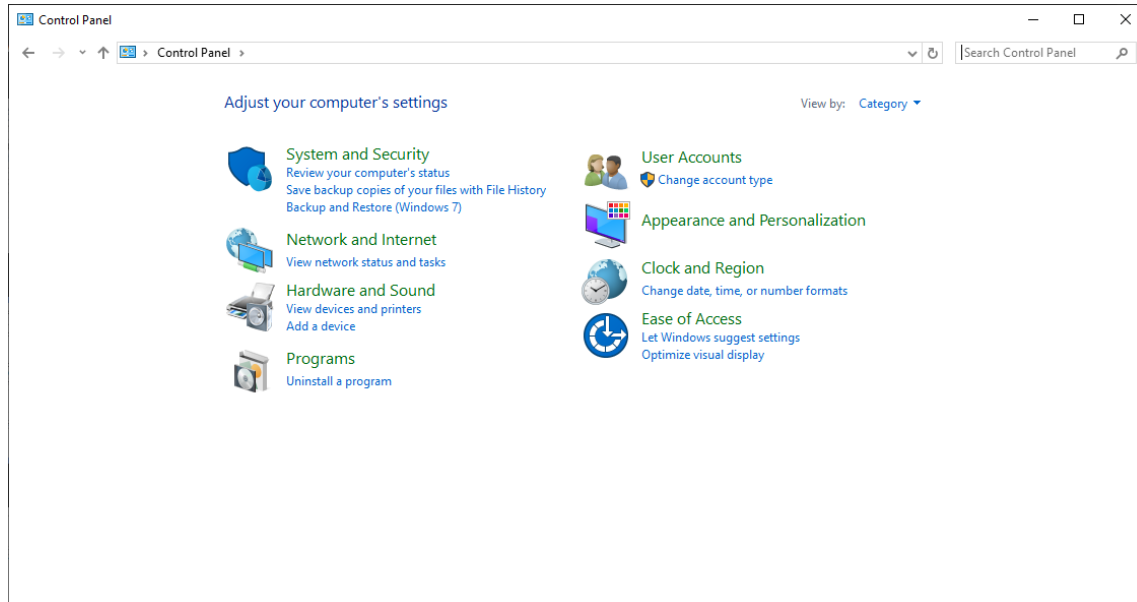

Step 1: Open the Control Panel

Click the **Start** button and search for **Control Panel**. Open the control panel from the search results.

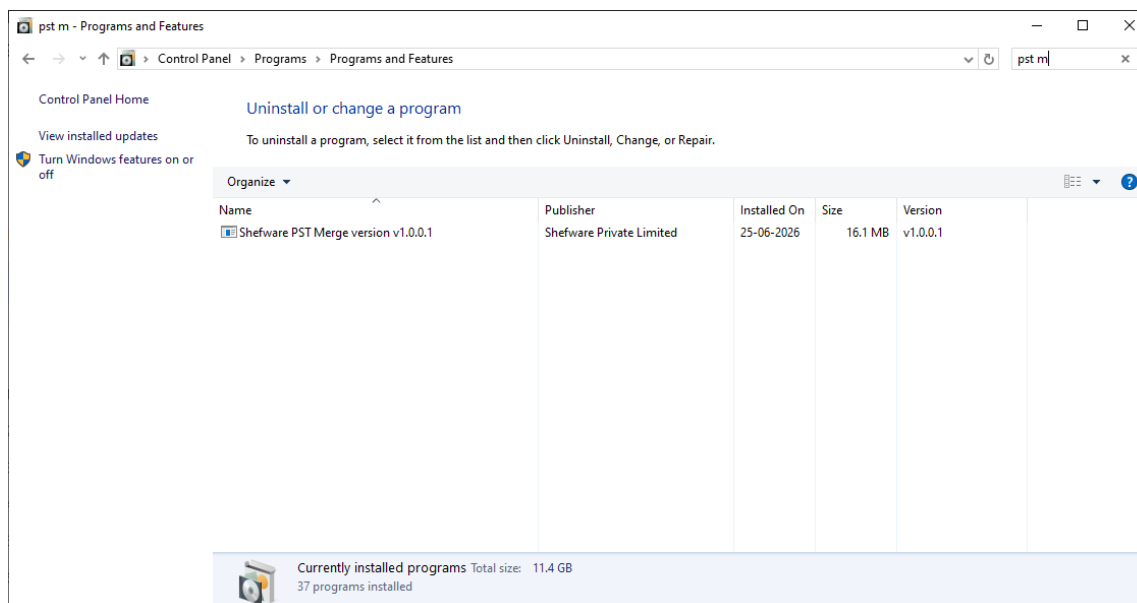

Step 2: Access Installed Programs

In the control panel, click on **Programs and Features** (or **uninstall a program**, depending on the Windows Version). A list of all the applications installed will be displayed.

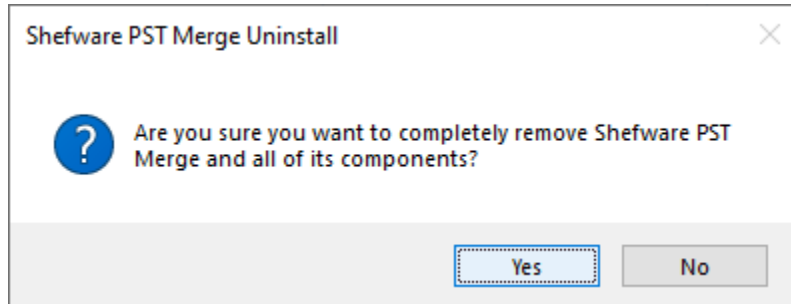

Step 3: Locate Shefware PST Merge

Scroll through the list and identify **Shefware PST Merge**. Choose the software and click **Uninstall**, or click twice on the application name to begin the removal process.

Step 4: Confirm the Uninstallation

Windows may show a User Account Control message asking whether you want to permit the application to make changes to your device. Click **Yes** to continue. When the uninstallation confirmation window shows, choose **Yes or Uninstall** to proceed further.

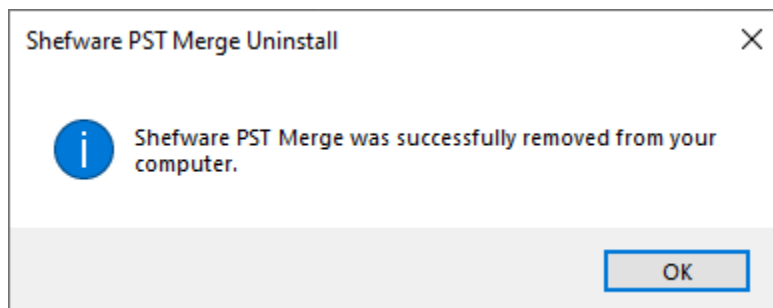

Step 5: Wait for the Removal Process

The uninstall wizard will automatically remove all program files and elements related to Shefware PST Merge. Kindly wait until the process is completed.

Step 6: Complete the Uninstallation

Once the removal process is completed, a confirmation message will show, specifying that **Shefware PST Merge** has been successfully removed from your computer. Click Finish or close to exit the uninstaller.
